**Date:** December 13, 2004

### For Immediate Release

## KMT Waterjet Systems to be Showcased in Terry Bradshaw's "Pick of the Week"

KMT Waterjet Systems ([www.kmtwaterjet.com](http://www.kmtwaterjet.com) or call 1-800-826-9274) has been selected to be showcased in Terry Bradshaw's "Pick of the Week," which appears on national TV. The segments will air December 21, 2004 between 6:00-7:00 a.m. EST and December 23, 2004 between 7:30 and 8:00 a.m. EST. The company was selected and the segment was produced by Broadcast News Corporation.

Broadcast News Corp.'s Executive Producer, Dan Usry, stated in a letter, "KMT Waterjet was chosen as a result of their commitment to excellence." Mr. Usry's letter continued, "As you know, we pride ourselves on bringing industry leaders to the attention of the marketplace and we are particularly excited about recognizing KMT Waterjet for their high level of achievements, which clearly are a result of a unified effort throughout the company and a highly productive, motivated workforce."

Broadcast News Corp. filmed the segments on location at KMT Waterjet in Baxter Springs, Kansas in October. Featured in the broadcast are Duane Johnson, President, Lee Davis, Vice-president of Operations and Dieter Tischler, Vice-president of Engineering, along with several others. The focus of each segment will be about the company's commitment to advancing the competitiveness of customers by advancing waterjet technology and finding new ways to help customers succeed.

Examples of the accomplishments include the introduction of new high pressure systems which deliver greater reliability and ease of use and the advancing of ways in which the company interacts with system integrators and customers.

KMT Waterjet has a worldwide presence and delivers complete high pressure systems including the pumps, valves and cutting heads, for cutting and cleaning with water, under pressures up to 60,000psi.
